JULY 11, 1996

IN RE: Application of Intermedia Communica-) ORDER
tions of Florida, Inc. for a Certificate) CLARIFYING
of Public Convenience and Necessity to) ORDER
Provide Intrastate Resold and Facilities)
Based Interexchange Telecommunications)
Services within the State of South Carolina.)

This matter comes before the Public Service Commission of South Carolina ("the Commission") by way of the request for clarification by Intermedia Communications of Florida, Inc. ("Intermedia"). On June 10, 1996, this Commission issued Order No. 96-400 granting Intermedia a Certificate of Public Convenience and Necessity to provide resold intrastate interexchange telecommunications services within the State of South Carolina. That Order did not reference the Commission's grant of authority to Intermedia to also provide facilities-based interexchange services and interexchange enhanced transport services. The Commission voted to grant Intermedia all of its requested authority in this Docket, and the omission of specific discussion of this authority in Order No. 96-400 was inadvertent and unintended. Therefore, we now grant Intermedia's request for clarification of the grant of the Certificate.

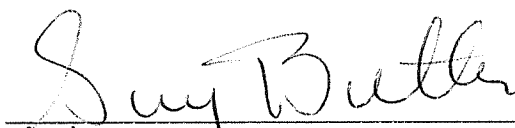

Intermedia filed its Application for a Certificate of Public Convenience and Necessity to resell interexchange telecommunications services in South Carolina on February 8, 1996. On March 6, 1996, Intermedia amended its Application to request a Certificate of Public Convenience and Necessity to provide resold and facilities-based interexchange telecommunications services in South Carolina, including interexchange enhanced transport services such as frame relay. The notice published properly referenced the requested authority. At the hearing held on May 28, 1996, at 11:00 a.m., Thomas E. Allen, Jr., discussed Intermedia's planned provision of facilities-based interexchange telecommunications services and enhanced transport services.

After full consideration of the applicable law, the Company's Application, and the evidence presented at hearing, the Commission now grants Intermedia's request for clarification and hereby finds that Intermedia has the experience, capability and financial resources to provide the services described in its Application. We therefore conclude that a Certificate of Public Convenience and Necessity should be granted to Intermedia to provide resold intrastate interexchange telecommunications services as stated in Order No. 96-400 as well as facilities-based interexchange services and interexchange enhanced transport services.
